

## **Financing Available for Orthopaedic Device Companies**

*Squadron Capital positioned to provide capital and manufacturing resources*

May 24, 2012 // Squadron Capital of Granby, Connecticut has agreed to provide up to \$3 million in financing to an OEM/medical device manufacturing customer of Squadron's medical device contract manufacturing companies, FMIHansa Medical and Structure Medical. This financing will support the OEM customer's purchase of instrument and implant sets manufactured by these two companies, and provides for repayment terms of up to five years.

The Squadron companies are uniquely positioned to serve the orthopaedic industry and have both the capital and the manufacturing resources (150,000 square feet) in four plants located in Alabama, Florida and North Carolina to provide OEM customers with this "hybrid" support model of financing plus manufacturing.
